Experience

Software Engineering Intern Full Satck JUNE 2022-
GetWork AUG 2022

- Single-handedly built a user onboarding flow from conceptualisation till finalisation.
- Implemented encrypted token-based authentication system, where the session is maintained accross subdomain using cookie and localStorage management.
- Working collaboratively with CTO in improving GetWork's products by adding and optimising features.
- Integration of user-facing elements developed by user-interface developers with server-side logic

Software Engineering Intern Backend AUG 2021 -
GetWork OCT 2021

- Made and maintained many APIs using Django-rest-framework.
- Contributed to making a real-time chat feature using React.js and Firebase.
- Used web Scraping for providing insightful leads to the sales team.
- Reusable code and libraries were created for future usage, and the programme was optimised for optimal performance and scalability

Technical content writer Intern DEC 2020-
GeeksForGeeks MAR 2021

- Wrote articles and blogs on data visualization and python with complete descriptions of the topics with written code samples and graphs.
- I wrote thorough posts on several Python libraries such as seaborn, matplotlib, and BeautifulSoup.

Projects

Costumer Relationship Management System

- This is a costumer relationship management system where an organization can register and then create agents under them.
- Leads will be created by organiser and assign them to respective agents.
- This was created using django and using django templates as frontend.

Polling Application

- This is a polling application where an user can create a poll share its link and all other users can vote and see the result.
- This was made using Django and django templates for frontend.

Education

Bachelor of Technology 2019-2023

Information Technology

2019-2023 | Maharaja Agrasen Institute of Technology Guru
Gobind Singh Indraprastha University, New Delhi, India
